PROJECTS

PROJECT1:E-COMM FASHION STYLE:REACT.JS

PROJECT DESCRIPTION:

E-comm Fashion Style is a dynamic and responsive e-commerce web-site built with React.js, showcasing a range of fashion apparel and accessories. This project highlights skills in front-end development, component-based architecture, state management.

ROLES AND RESPONSIBILITIES

- Frontend Developer
- Developed front-end web pages using HTML, CSS, JavaScript, and React.js.
- Implementing the components like Product display,search-bar,Header,ProductId,Cart,WishList.
- implementing the router-mechanism and redux .
- Integrated RESTful APIs to fetch and display data on view pages.
- Utilized Git for version control and code management.

PROJECT2:MY-PORTFOLIO

PROJECT DESCRIPTION:

"My Portfolio" is a responsive and visually engaging personal website that showcases my skills, projects, and professional journey. Built using modern web development technologies, the portfolio offers an intuitive user experience with sections for an introduction, about me, project highlights, contact information, and social media links.

ROLES AND RESPONSIBILITIES

- Frontend Developer
- Developed front-end web pages using HTML, CSS, JavaScript, and React.js.
- Built and integrated components such as Header, Footer, About Me, Experience, Navigation Bar, and My Projects.
- implementing the router-mechanism.
- Designed responsive layouts for seamless viewing across devices.
- Utilized Git for version control and code management.
